Only census tracts displayed with population under age 6 > 0. Map data from scchildcare.org (provider locations as of May 25, 2021); SC Office of Revenue and Fiscal Affairs (school locations); 5-year American Community Survey (all population data); SC Education Oversight Committee (2019 KRA Results).

FIRST STEPS
SOUTH CAROLINA

⊞ +ableau   ← **(7)** ⤶ ⤓ ⛶

(1) **Select a County or Multiple Counties:** click the down arrow and the list of counties will appear. You can select as many counties as you want. The map and the statistics listed under "Selected Geography" will change according to what you select.

Select a County or Multiple Counties
(Multiple values) ▼

☐ (All)
☑ Abbeville
☐ Aiken
☑ Allendale
☐ Anderson

2 **Select Child Care Desert Status:** click the down arrow and a list will appear to ask if you want to display census tracts that are considered a child care desert ("Yes"), not a child care desert ("No"), or both ("All"). The map and the statistics listed under "Selected Geography" will change according to what you select.

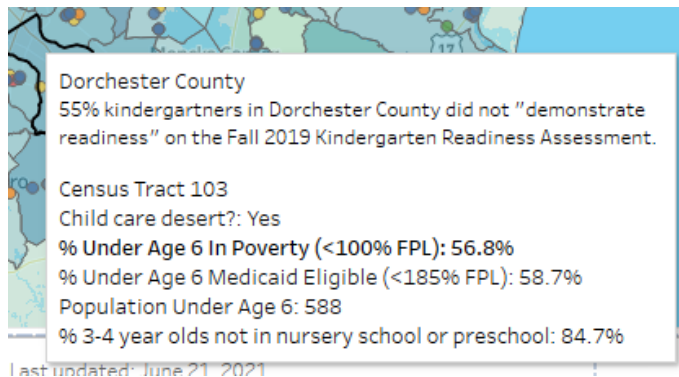

3 **Map Tools:** if you hover over the top left of the map, a navigation bar will appear that will allow you to interact with the map in different ways, like zooming in and out or panning around.

4 **Base Color of Map:** the base map is the proportion of children under age 6 who are in poverty (<100% of the federal poverty level). This scale will change dynamically with the map view, but the darkest color will always indicate the highest proportion

5 **Point Data:** the points on the map represent locations of child care and school facilities. The colors correspond to the facility type as displayed in the legend. If you click on a color in the legend, only that facility type will be highlighted. To deselect, click the color again.

6 **Tooltips:** if you hover over different features of the map, text boxes with more information will appear. If you hover over a census tract, details about the county and tract will appear. If you hover over a provider, details about the provider's location and grades served (if a school) or capacity and ABC Quality level (if a child care).

7 **Tableau tools:** you can share, print, or make the map full screen using these buttons in the bottom right of the screen.
